What is a screw-type air compressor?

Screw-type air compressor structure of a unique design, a compact, stylish appearance, high efficiency, small energy consumption, low noise characteristics and long life, is a smart environment-friendly products. Is widely applied in metallurgy, machinery, chemicals, and mining, and electric power industries of the ideal gas source equipment.

How does a screw air compressor work?

Screw air compressor is divided into air cooling type and water cooling type, through the fan or water forcing cooling. Air cooling system consists of cooling fan, oil coolers and air cooler. The cooled air is pumped into the fan; go through oil cooler and air cooler, and at the same time, cool and compressing lubricating oil and air.
