

# Down-the-hole drill winch working video

What is a down-the-hole drill?

A down-the-hole drill, usually called DTH by most professionals, is basically a jackhammer screwed on the bottom of a drill string. The fast hammer action breaks hard rock into small cuttings and dust that are evacuated by a fluid (air, water or drilling mud). The DTH hammer is one of the fastest ways to drill hard rock.

What is down-the-hole (DTH) drilling?

Down-the-hole (DTH) drilling has made it easier for contractors to drill wells faster and more efficiently, and to transition from dirt boring to rock boring just by adding a compressor and hammer to the drill bit.

What is a drill-powered winch?

A drill-powered winch is a lightweight tool made of quality materials that is easy to install on your trailer. It uses drill power to pull or lift something on the trailer or anywhere you want, saving you strength and time.

How does DTH drilling work?

With DTH drilling, contractors can change the drill that they were using for the current directional bore to a rock drill when they encounter rock by connecting the drill with a compressor and a steerable hammer. Well drilling also needed changes to be made to rotary drilling when the well needed to take a turn.

How long did it take to drill a 12,000 ft hole?

The original estimate for completion of a 12,000-foot hole was 30 days using the conventional rotary technique, which was reduced to 13 days using the DTH method. Before DTH was used, drillers would typically case the vertical portion of the well and convert to rotary drilling to drill at a tangent.

What makes a DTH drill system different from other drilling systems?

The advent of tungsten carbide for the drill bits (the first bits were all-steel) and the development of the button drill bit coupled with the introduction of high air pressures (25 bar plus) has meant that the DTH system can compete easily and efficiently with other drilling systems.

in this video, the workings of the borewell machine have been explained in detail in which the working principle of dth machine has been explained with the help of 3d animation.

We provide high-quality educational videos in engineering, science and technology. Dive in with us as we explain how things work and discover ...

In this blog, I'll share some key insights on how to operate the winch in DTH drilling. Before delving into the operation, it's essential to understand the role of the winch in ...

+ A rig you can rely on - shift after shift SmartROC rigs from Epiroc work consistently and effectively even in

# Down-the-hole drill winch working video

the most demanding conditions. Air capacity is the most important factor ...

Winch not working? Learn how to fix common winch failures like no power, overheating, cable jams, and solenoid issues with this field ...

A down-the-hole drill, usually called DTH by most professionals, is basically a jackhammer screwed on the bottom of a drill string. The fast hammer action breaks hard rock into small ...

A down-the-hole drill, usually called DTH Drilling Rig, is basically a mini jackhammer screwed on the bottom of a drill string. The speedy hammer ...

Through our videos, we hope to shine a light on the beauty of hard work and the tools that help make it all possible. Hit that subscribe button and join us in celebrating the unsung heroes behind ...

The geological drilling rig (full hydraulic core drilling rig and vertical spindle core drill rig) and geological drill tools (drill rod, drill bit core barrel and parts of machine etc), water well drilling ...

The YATOINTO Portable Drill Winch is a handy tool for pulling and dragging. This gray hand winch weighs only 11 pounds. It has a strong 1000 LB pulling capacity. It comes ...

when the core is full in the inner tube, then you need put down the overshot assemble into the hole through wire line (winch supply), the lifting dog will lock with the spear point automaticly ...

The reason customer want to drill the hole is that drill and blast is the most efficient and economic way to break rock instead of excavating it. ...

Down-the-hole, or DTH drilling allows for reaching greater depths with the hammer located right behind the drill bit. Robit is a leader in DTH products.
