Cougar Drilling Solutions, established in 1969, is a renowned company that specializes in the design, manufacture, and...

How many oil rigs are there in Alberta?

Alberta had 10 or 11 oil and gas rigs operating in late May and through June, most of it in the Montney field northwest of Grande Prairie. The previous low in that 30 year period was 26 rigs during the 2016 oil price slump. The high was 534 operating rigs from both February of 2006 and 2012. The median since 2003 is 190 rigs.

What are the health and safety hazards of oil rigs?

Workers on oil rigs, both on land and off-shore, are routinely exposed to health and safety hazards. For instance, rigs drilling for oil often encounter pockets of pressurized gas which create an event called a blowout. Blowouts can cause fires, create an explosion and scatter drilling waste a significant distance.

What are the disadvantages of drilling for oil?

Unfortunately, exploiting the earth's petroleum resources can be difficult, and it has a serious environmental impact. As oil reserves decrease, the disadvantages of drilling for oil increase. World oil consumption continues to increase, and once-full reserves are slowly becoming depleted.

What happens when a drilling rig blows out?

For instance, rigs drilling for oil often encounter pockets of pressurized gas which create an event called a blowout. Blowouts can cause fires, create an explosion and scatter drilling waste a significant distance. The 2010 Deepwater Horizon spill began with an explosion on the drilling rig which killed 11 workers and injured several more.

How bad is Alberta's oil market?

While it's not been this bad in the Alberta oil patch for the past few decades, long-time oil and gas analyst and executive David Yager says there's good news out there no one is talking about much, namely the rapid rebound in the price of oil and the price of natural gas, which is more than double what it was last June.

At ICON Drilling Services International Ltd., we specialize in delivering highly efficient and fully functional drilling rig designs and manufacturing services to ...

Over 25 Years 7500 psi Circulating System! Excalibur Drilling Ltd. operates four identical ultra-heavy tele-double drilling rigs in Western Canada with vertical ...
